

FACULTY

Claudio Feijóo is full professor at the UPM and researches the socio-economic impact of emerging technologies in the information society and has been involved in many technology-based start-up companies.

Ernestina Menasalvas is associate professor of Data Mining at the School of Computer Engineering (UPM). Ernestina is a member of MIDAS data Mining and data simulation group at the Center of Biotechnology at the UPM.

Ferrnando Calle is full professor of Electronics, Nanotechnology and Microsystems with the Department of Electronics Engineering at the Universidad Politécnica de Madrid (UPM). He currently leads the Semiconductor Device Group.

Gustavo Alonso is associate professor at the School of Aeronautics and Space Engineering (UPM). His research interests focus on space systems engineering, aerospace structures and air transport.

José María López is associate professor at UPM, Director of INSIA and of INSIA's Environmental Impact Unit. He is an experienced researcher in the field of alternative vehicle propulsion systems and pollutant emissions due to road traffic.

FEES

DecaTech (8 topics) & Spanish – 2500 € (500 € a week) + Room & Board charges – 1500 € (300 € a week)

8 Tech 4000 €

PentaTech & Spanish (5 topics) – 1800 € (360 € a week) + Room & Board charges – 1500 € (300 € a week)

5 Tech 3300 €

Discounts available for tuition fees.

Pascual Campoy is a full professor of Automatics at the UPM (Spain) and visiting professor at TU Delft. Pascual leads the UPM's Computer Vision and Aerial Robotics Research Group at the Center of Automatics and Robotics (C.A.R.).

José A. Mañías is part-time full professor at the UPM. He works as a freelance consultant specializing in information security, a consultant for the Spanish NSA and NATO, an expert in ISO working groups (information security and risk management), and as a product developer (risk management tools).

Carlos del Cañizo is Director of the Solar Energy Institute. He has lengthy experience in solar cell fabrication and characterization. He has also researched the topic of silicon ultrapurification for photovoltaic applications.

María J. Ledesma is associate professor at the UPM and leads research lines at the Biomedical Research Networking Center. Her main research interest concerns biomedical imaging technologies to improve healthcare delivery.

Antonio Molina is a full professor of Biochemistry and Molecular Biology at the UPM. He is the Director of the Center for Plant Biotechnology and Genomics. Dr. Molina leads a CBGP research group focusing on plant immunity applied to crop protection.

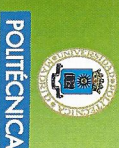

HOW TO APPLY

Apply online at <http://decatech.upm.es/fees/> or download, complete and submit the application form to info.decatech@upm.es

KEY DATES

- Early bird registration: 1 March 2018
- DecaTech starts 25 June 2018
- Registration: 30 April 2018
- DecaTech ends 27 July 2018
